## MAINTENANCE AND MODIFICATION DATA

Broadcast Products Division

AM-106-EEB

Equipment: MW-5

2/14/77

Bulletin No.

Date

SUBJECT: Shorting Sticks

Purpose: Improve Ground Contact

Material: Loctite 271 Sealant

PROCEDURE: Over a period of time it is possible for the bolts, which secure the shorting stick cable, to become loose. To prevent this, it is recommended that Loctite 271 sealant be used on all shorting stick nuts and the nuts tightened. After tightening, check the resistance of the ground cable to ground. The resistance should be less than one ohm. This will insure a good ground connection.

Loctite 271 sealant will be furnished to all MW-5 users at no charge. Harris part number 086 0001 004.
