

THE MATCHBOX

IHF ↔ PRO
INTERFACE AMPLIFIER

The MATCHBOX is the ideal, inexpensive way to correctly interconnect "HiFi" or Semi-Pro (IHF standard) equipment with professional studio gear. The Matchbox is a bi-directional unit, with *four* independent amplifiers providing full stereo input *and* output interface. Two amplifiers convert a stereo IHF HI-Z unbalanced source to LO-Z balanced outputs at studio level. A second pair of amplifiers converts a stereo balanced studio line source to unbalanced IHF outputs to feed the inputs of an IHF device. All circuitry is active and direct-coupled for absolute sonic transparency. The Matchbox is compact and lightweight, allowing it to be permanently mounted to most cassette recorders, tuners, portable mixers, etc.

- GAIN IS ADJUSTABLE TO +20DB
- +26DBM MAXIMUM OUTPUT LEVEL
- .008% DISTORTION, 90DB S/N
- ALL ACTIVE DIRECT COUPLED CIRCUITRY
- DOES NOT LOAD OR GROUND STUDIO LINES
- SELF CONTAINED REGULATED POWER SUPPLY
- PROVIDES EXTRA AC OUTLET FOR CONVENIENCE
- MADE WITH HIGH QUALITY U.S.A. COMPONENTS
